DETAILED ACTION

This is a first office action on the merits of patent application S. N. 10/782,99.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim1, the phrase "in particular" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim 1 recites the limitations:

- "the driven rotor", lines 1-2,
- "the fan", line 3,
- "the effective liquid flow", line 4,
- "the setting unit", line 5.

There is insufficient antecedent basis for these limitations in the claim.

Claim 1 recites setting signals in lines 5 and 6. It is not clear if these are the same or different.

Claim 2 recites "a target speed setting signal (GPWM)" (line 2), it is not clear this signal is the same signal recited in line 10 of claim 1.

Concerning claims 3 and 4, the procedural steps encompassed by "accordingly" (line 3) are unascertainable.

Allowable Subject Matter

Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gee ('880), Mohan ('325), Weible et al. ('045), Rockey et al. (865), Okita et al. ('446), Kelledes et al. ('371), Ono et al. ('765), Hummel et al. ('536), and Smith et al. ('115) disclose other apparatus for controlling fluid shear clutches.
